Installing WordPress

- Automatic Update "Update to new minor versions and security releases"
- WordPress Plugin Automatic Update > Do not automatically update WordPress plugins.
- WordPress Theme Automatic Update> Do not automatically update WordPress themes.
- Automatic Update Backup> Create a backup and automatically restore the backup if the update fails.

Automatically update the installed application immediately as new versions become available. Updates execute between midnight and 6AM server time and email notifications are sent with the result of each update.	Automatic Update Do not automatically update. Update to new minor versions and security releases. Update to any new version.
After 14 days the created backup automatically expires and is deleted to free disk space. However, prior to expiration the created backup can be retained by selecting the option from your "My Backups" tab.	WordPress Plugin Automatic Update Do not automatically update WordPress plugins. Update WordPress plugins as new versions become available.
	 WordPress Theme Automatic Update Do not automatically update WordPress themes. Update WordPress themes as new versions become available.
	Automatic Update Backup Create a backup and automatically restore the backup if the update fails. Do not create a backup.

You can leave the
remaining options
under Settings and
Advanced on the
default settings.

When done click the **install** button
